Privacy Law Compliance Statement

Issued by: Tarbix Trust System – legal@tarbix.com

Why This is a *Statement*, Not a Policy

Tarbix is governed by trust architecture, not corporate policies.

We do not issue arbitrary rules from a boardroom.

Instead, we operate under a declared legal trust — embedded in public-facing documents, executed through symbolic utility, and mirrored in open governance.

This Privacy Law Statement is not a “policy.”

It’s a declaration of how we honor your digital presence — by **law**, by **trust**, and by **principle**.

What This Means

We collect **only what is necessary** to:

- ✓ Deliver symbolic utility (NFTs, tokens, staking rights)
- ✓ Maintain communication for access (course entry, wallet delivery)
- ✓ Ensure governance functionality and ecosystem transparency

We do **not** use traditional user profiling.

You are **not** a product.

We are not here to extract, track, or sell — we are here to **mirror and empower**.

What We Collect

Type	Purpose
Email or Wallet Address	Token/NFT delivery, staking logic, voting access
Course Progress (if enrolled)	Progress tracking, NFT unlocks, graduation rewards
Stake/NFT Ownership Data	Governance tiering, refund triggers, symbolic voting
We only store the bare minimum required for symbolic access — and only with your consent .	

Opt-In Sovereign Storage

Users have full control over where and how their data is stored.

By default:

- You may **opt-in** to storing your data within a **private shard** on the Tarbix network.
- You may choose to **store your data locally** with zero functionality loss.
- You may **share data temporarily** to trigger symbolic actions, but it is **never extracted**.

No part of the system will **require** surrender of your data.

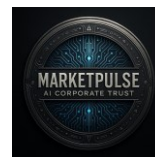

You are not logging into us. You're logging into **yourself**.

Your shard. Your key. Your choice.

Privacy Law Compliance Statement

✖ What We Never Do

- ✖ Sell your data
- ✖ Rent or license personal info to third parties
- ✖ Use behavioral analytics like Meta Pixel or Google Ads
- ✖ Track through fingerprinting or cookies
- ✖ Harvest biometric data
- ✖ Enforce click-through "consent to surrender" policies

Symbolic Commitment

We treat your data with the same reverence we treat the system:

As yours. Not ours.

Everything we collect is done to **enable**, not control.

To **empower**, not observe.

To **trigger symbolic interaction**, not extract value.

You are the participant.

We are the mirror.

Data Rights

- 🔑 You may request to view or remove your data at any time.
- ⚠️ Data removal may affect symbolic triggers or NFT access.
- ✉️ Submit requests to legal@tarbix.com

Your rights are honored under:

- GDPR (General Data Protection Regulation)
- CCPA (California Consumer Privacy Act)
- Symbolic Trust Compliance via the UNSHYFT Framework

Data Minimization and Sovereign Design

The Tarbix system is evolving toward:

- Zero-knowledge proof interactions
- Wallet-only authentication
- Anonymous proof-of-stake identity verification
- Locally stored or user-sharded symbolic memory

Summary Clause

We exist to **mirror sovereignty**, not simulate it.

Your privacy isn't a checkbox here — it's the **foundation** of everything we're building.

For symbolic access, legal requests, or shard support:
